PROFESSIONAL SUMMARY

Information Security Specialist with passion for aligning security architecture plans and processes with security standards and business goals. Extensive experience developing and testing security framework for cloud-based software. Versed in robust network defense strategies.

SKILLS

- Community engagement
- Documentation skills
- Penetration testing
- Incident response management
- SIEM management
- Zero-day exploit prevention
- Scripting languages
- Ethical hacking
- Monitoring and Evaluation
- Network security
- Vulnerability assessment
- Web application security
- Software deployment
- DDoS prevention
- Cybersecurity frameworks

WORK HISTORY

Community Development Volunteer

CorpsAfrica/Kenya - Busia

09/2025 - Current

- Led community outreach and engagement activities reaching **100+ beneficiaries monthly and 500+ over service period** through forums, meetings and household visits.
- Organized and supported **fundraising and resource-mobilization events** contributing to the establishment of **community-led income projects creating ~50 livelihood opportunities**, mainly for youth and women.
- Facilitated **10+ open forums and town hall meetings** with **30–300 participants per session**, strengthening inclusive participation and local decision-making.
- Designed and delivered **training workshops for 100+ community members** on livestock farming, financial management, and project planning, improving practical skills and income readiness.
- Conducted **community asset mapping and needs assessments** covering **2 villages and 200+ households**, identifying priority projects in pig farming, poultry, and indigenous vegetables.
- Supported development of **grant and project proposals** valued at **KES 300,000+**, strengthening community access to external funding.
- Implemented **monitoring and evaluation tools** to track outputs, participation, and income outcomes, enabling evidence-based project adjustments.

- Promoted environmental and sustainable practices through **community sensitization sessions** integrated into livelihood and agriculture activities.
- Created safe spaces for **youth mentorship and engagement**, reaching **100+ youths** through schools, churches, and community forums.
- Strengthened partnerships with **local leaders, churches, NGOs, and community groups**, improving coordination of social services and development initiatives.

Back-end Developer

THE HOT PLATFORM - Remote

05/2023 - 01/2025

- Designed and deployed 2 **robust, scalable RESTful API endpoints** using **Django**, enabling reliable communication between front-end and back-end systems.
- Improved system performance and data flow efficiency by **optimizing API response times and request handling** across core application modules.
- Integrated **third-party services (including Zoom APIs)** to support virtual meetings and system interoperability, enhancing overall user experience for **100+ active users**.
- Collaborated with a **cross-functional team of 5–8 developers, designers, and project stakeholders** to gather requirements and deliver production-ready integrations.
- Implemented **API security controls** such as input validation, authentication, and access control, reducing exposure to common vulnerabilities including **SQL injection and XSS**.
- Managed codebase changes using **Git**, contributing **50+ commits**, pull requests, and issue fixes while following team version-control workflows.
- Wrote and executed **unit tests covering core API functions** and actively participated in **code reviews**, improving code quality and reducing post-deployment bugs.

Software Developer Intern

University of Nairobi Enterprises - Kakamega

02/2023 - 01/2025

- Contributed to the development and improvement of the KenyaEMR system by participating in multiple workshops.
- Fixed bugs reported through user feedback and implemented UI enhancements to improve user experience.
- Supported the remote and on-site installation and maintenance of the KenyaEMR system across Kakamega, Bungoma, Trans Nzoia, West Pokot, and Turkana counties.
- Volunteered as a judge for a 4-day hackathon at Chuka University, evaluating projects centered around the Electronic Health Information System (eCHIS).
- Participated in a 2-week KenyaEMR system hackathon in Naivasha, working on front-end development using React.js.
- Engaged in a 1-week KenyaEMR system hackathon in Nakuru, collaborating with a team to fix critical bugs and implement new features.
- Implemented operational solutions such as remote support protocols using Any-desk and created shell scripts to automate tasks.
- Provided technical assistance to hospital staff in troubleshooting KenyaEMR system issues remotely.
- Corrected errors related to user creation, improving system reliability and ensuring accurate, error-free data in the Electronic Health Information System (eCHIS).

Internship Student

- Provided comprehensive IT support and maintenance services ensuring optimal system performance and user satisfaction.
- Leveraged diverse design software skills to assist with project development and implementation, contributing to innovative solutions.
- Implemented and updated application modules, following ICT manager's directives for optimal system performance.
- Executed software changes and alterations, aligning with specific design specifications.
- Developed, communicated, and managed comprehensive project plans, ensuring successful project delivery.
- Collaborated on strategic initiatives, contributing to the design, coding, and testing of innovative solutions.

EDUCATION

Bachelor's Degree: Computer Science

Masinde Muliro University of Science And Technology - Kakamega

12/2022

- GPA: Second Class Upper
- GPA: 3.3 GPA

No Degree: Cybersecurity Analyst

Jomo Kenyatta University of Agriculture And Technology - Juja

05/2025

LANGUAGES

Languages: English

CERTIFICATIONS & TRAINING

Certificate in Responsive web design by FreeCodeCamp

Zscaler Zero Trust Associate(ZCTA)

Data Protection Basics
